Next Public Planetarium Show...

Extrasolar Planets & Extraterrestrials

Does life exist on other planets? What kind of planets exist outside of our Solar System? How do planets form? Where are planets most likely to be found? What are the methods that we can use to detect them? In this presentation, some of the answers to these questions will be covered as well as a broad overview of the current knowledge concerning extrasolar planets.

Thursday, Feb. 8, 2007

6:45 pm, 8:00 pm, 9:15 pm

Tickets must be reserved
online:
